**Excerpts on:**

**Adam and Eve**

P. 828

At the time Adam was chosen to come to Urantia, he was employed, with his mate, in the trial-and-testing physical laboratories of Jerusem. For more than fifteen thousand years they had been directors of the division of experimental energy as applied to the modification of living forms. (genetic manipulation-ed.)

P. 840

Caligastia paid frequent visits to the Garden and held many conferences with Adam and Eve, but they were adamant to all his suggestions of compromise and short-cut adventures

P. 841

One day, during a talk with Eve, it occurred to Serapatatia that it would be very helpful if, while awaiting the recruiting of large numbers of the violet race, something could be done in the meantime immediately to advance the needy waiting tribes.

P. 847

This site was known to Adam as one of the three original selections of the committee assigned to choose possible locations for the Garden proposed by Van and Amadon. The two rivers themselves were a good natural defense in those days, and a short way north of the second garden the Euphrates and Tigris came close together so that a defense wall extending fifty-six miles could be built for the protection of the territory to the south and between the rivers.

P. 848

The two boys never got along well, and this matter of sacrifices further contributed to the growing hatred between them. Abel knew he was the son of both Adam and Eve and never failed to impress upon Cain that Adam was not his father. Cain was not pure violet as his father was of the Nodite race later admixed with the blue and the red man and with the aboriginal Andonic stock. And all of this, with Cain's natural bellicose inheritance, caused him to nourish an ever-increasing hatred for his younger brother.

P. 849

The religious rulers, or priesthood, originated with Seth, the eldest surviving son of Adam and Eve born in the second garden. He was born one hundred and twenty-nine years after Adam's arrival on Urantia. Seth became absorbed in the work of improving the spiritual status of his father's people, becoming the head of the new priesthood of the second garden.

P. 850

The Sethite priesthood was a threefold undertaking, embracing religion, health, and education. The priests of this order

were trained to officiate at religious ceremonies, to serve as physicians and sanitary inspectors, and to act as teachers in the schools of the garden.

P. 850

And when thinking of the Sethite priesthood, do not confuse those high-minded and noble teachers of health and religion, those true educators, with the debased and commercial priesthoods of the later tribes and surrounding nations. Their religious concepts of Deity and the universe were advanced and more or less accurate, their health provisions were, for their time, excellent, and their methods of education have never since been surpassed.

P. 850

Adam and Eve were the founders of the violet race of men, the ninth human race to appear on Urantia. Adam and his offspring had blue eyes, and the violet peoples were characterized by fair complexions and light hair color--yellow, red, and brown.

P. 851

The body cells of the Material Sons and their progeny are far more resistant to disease than are those of the evolutionary beings indigenous to the planet. The body cells of the native races are akin to the living disease-producing microscopic and ultramicroscopic organisms of the realm. These facts explain why the Urantia peoples must do so much by way of scientific effort to withstand so many physical disorders. You would be far more disease resistant if your races carried more of the Adamic life.

P. 851

After becoming established in the second garden on the Euphrates, Adam elected to leave behind as much of his life plasm as possible to benefit the world after his death. Accordingly, Eve was made the head of a commission of twelve on race improvement, and before Adam died this commission had selected 1,682 of the highest type of women on Urantia, and these women were impregnated with the Adamic life plasm. Their children all grew up to maturity except 112, so that the world, in this way, was benefited by the addition of 1,570 superior men and women. Though these candidate mothers were selected from all the surrounding tribes and represented most of the races on earth, the majority were chosen from the highest strains of the Nodites, and they constituted the early beginnings of the mighty Andite race.

P. 852

Adam lived for 530 years; he died of what might be termed old age. His physical mechanism simply wore out; the process of disintegration gradually gained on the process of repair, and the inevitable end came. Eve had died nineteen years previously of a weakened heart. They were both buried in the center of the temple of divine service which had been built in accordance with their plans soon after the wall of the colony had been completed. And this was the origin of the practice of burying noted and pious men and women under the floors of the places of worship.

P. 853

They did not long rest in the oblivion of the unconscious sleep of the mortals of the realm. On the third day after Adam's death, the second following his reverent burial
